OUR MISSION

OUR MISSION

What if you could make a real difference in the world? What if you could make that difference from wherever you are right now?

Whilst some of us are privileged and have much to be grateful for, there are many in the world who are suffering as their basic physiological needs such as food, shelter, hygiene and healthcare are not met.

Look, the world is not a fair place, we understand that. Pause for a moment and think, what if you could do something to make a small difference in the lives of others? This is our mission here at Safe Community Token.

We recognise there are a lot of us out there that want to make a real impact on the world. So we created Safe Community Token to do exactly that. Our mission is to help communities fight hunger, provide basic hygiene, healthcare, and reduce homelessness around the world. In addition to this, we aim to provide fundamental education to women who are the backbone to a developing society.

"Around 690 million people go to bed on an empty stomach each night. This number is set to exceed 840 million by 2030." Worldvision. Here at Safe Community Token, this is one of our major priorities. We give our community the ability to be part of something bigger than ourselves, and we do not stop there.

Being a digital platform, we are well aware of the psychological dangers of cyberbullying and digital addictions. Therefore, we are simultaneously working towards tackling the issues that plague our digital communities.

In order to build loyalty and trust within our community the team at Safe Community Token are building partnerships within the cryptocurrency space alongside strong communities like Supernova Protocol and Yieldpanda.

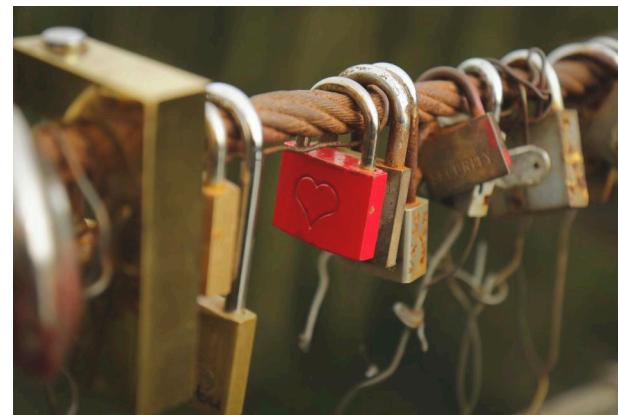

Nothing is easy in this world, but we do intend to keep working until we achieve these goals.

SAFE COMMUNITY TOKEN FEATURES

- ❑ Maximum limit to sells and buys to avoid manipulation.
- ❑ The token has no owner, no private sale, no presale, no launch event.
- ❑ Helping to reduce hunger and poverty around the world.
- ❑ To tackle cyberbullying and digital addictions.
- ❑ Renounced ownership.
- ❑ To raise awareness of the importance of the education of women in developing countries.
- ❑ We are community-driven and will provide a “Safe community” for everyone.
- ❑ You are an integral part of the community that will help to shape the future of SAFECOM.

VISION FOR THE FUTURE

VISION FOR THE FUTURE

We understand the difficulties of identifying and confidently investing in a token. Our research finds that the lack of funding in this capitalist world can have a huge impact on the crypto community. This is why we have crafted Safe Community Token around trust and empowering its communities to use fundraising for the right reasons.

Safe Community Token was created to make sure that once you find us, you do not have to be worried whether you have invested in a legitimate token. You will have peace of mind that the purpose you entrusted your investment for, is being fulfilled. Our outcomes will be evidenced through case studies which will be shared with the community.

As much as delivering on our main goals is crucial, we will be building an authentic ecosystem which has true intrinsic value. This is a key aspect of the project as it enables us to deliver on our promises in the real world and for our investors to be rewarding by way of interest and by way of social achievements through helping communities around the world.

We plan on increasing our partnerships with other tokens who have established good communities. This will help grow our ecosystem as well and give our community rewards. It will benefit our ecosystem by allowing our users to have their investments backed up by other instruments with a long trusted history and a variety of options when it comes to swapping and using their tokens for other purposes.

SAFE COMMUNITY TOKEN

SAFE COMMUNITY TOKEN

As the name perfectly indicates, Safe Community Token is structured to be safer and community driven. This is key to our goal and mission in order to build trust in the token. In that regard all the different aspects of the token will directly be decided by the community. This will ensure that the Token remains trustworthy, safe and obviously community driven.

The way decisions will be taken regarding the token will be a testimony of the trust we have built and will continue to build upon this relationship between SAFECOM and the community as we grow and develop. This will be reflected in the structure of the token, the ecosystem we will build together and the many benefits that will be gained from our partnership with you and other tokens.

Safe Community Token will be used as the main currency in our communities and projects, this is another way to have the Token backed in value and ensuring growth in value over time.
